

Why You Need an ADA Transition Plan

- ▶ Reduces risk of future litigation
- ▶ Reduces potential loss of state and federal funding
- ▶ Details methods required to make facilities accessible
- ▶ Minimizes possibility of a settlement agreement with the Department of Justice

Steps to Compliance

- 1 Designate an employee to oversee Title II compliance (ADA Coordinator)
- 2 Provide notice to the public about the ADA requirements
- 3 Adopt and publish a Title II grievance procedure
- 4 Identify and evaluate current services, policies, practices, and facilities
- 5 Provide an opportunity for public input
- 6 Develop (and maintain) a Transition Plan for needed structural changes, including an implementation schedule
- 7 Monitor the progress on the implementation of the Transition Plan

Kimley»Horn

Expect More. Experience Better.

How We Can Help with Your ADA Transition Plan

Kimley-Horn is a recognized leader in developing ADA Transition Plans. Our team has assisted numerous Title II agencies (including DOTs, municipalities, counties, universities, and transit agencies) with developing an implementation plan to upgrade aging infrastructure to meet applicable ADA standards. We understand how to identify and secure funding through active federal grants and implement improvements that benefit our clients and the general public.

Kimley-Horn has worked independently and with partner accessibility experts to deliver ADA services and accessibility solutions in compliance with all state and federal accessibility laws.

GIS-Based Data Collection

KADA is a GIS/GPS-based data collection, data processing, and data management software application used to develop and implement ADA Transition Plans. This Kimley-Horn asset management solution has the features and benefits listed to the right.

An integrated, fully customizable data collection field form

Integrated digital camera

Photographs and data that synchronize in real time with GIS

Reduction in human error with in-field quality control checks

A Kimley-Horn Asset Management Solution

Value to Partners and Clients

Kimley-Horn is able to provide value to our partners and clients by:

- ▶ Improving data collection efficiency and data quality by using the cloud and online GIS-based applications
- ▶ Providing cost savings to complete data processing and reporting with automation
- ▶ Increasing effectiveness of tracking projects and monitoring ADA Transition Plan implementation using a customized dashboard
- ▶ Consulting with partners and clients on their obligations under the ADA and on ADA-compliant design
